

SCANNO

TACTICAL X-RAY

Overview

SCANNO [SCANSILC 1824] - is an 18 x 24 cm format, tactical, lightweight x-ray system, designed for users that need the flexibility to take high quality x-ray images on the move.

This innovative rugged x-ray system packs into a small fitted canvas bag and is pre-configured with tablet and imager back-to-back for rapid deployment. With no set up required, the entire system can be positioned to take x-rays in less than a minute without the hassle of interface boxes, trailing wires or wireless drops outs.

Use with our proprietary **ScanView** imaging software or XTK.

SCAN-NO

NO cables, cords or connectors to deal with

NO trailing wires to trip over

NO bulky communication boxes near the target area

NO wi-fi drop outs to worry about

NO wireless interference issues

NO connection to either controller or generator required to capture images [Offline/Storage Mode]

NO wasting time and

NO hassle

Highlighted Features

- Total system operational weight of <5 kg
- Pre-configured for fast Grab-and-Go deployment
- Best in class imaging quality of 76 microns
- Ruggedised unibody design - not a medical panel in a protective cover
- Unique 'panel' IP67 environmental protection against dirt, dust and water ingress.

Multiple Operational modes -

- Synchronised wired or wireless control from a tablet/laptop
- Standalone AED [Automatic Exposure Detection] Mode
- Storage Mode - collect 300 target images on the panel for selection and download on demand.
